SUMMARY

Software Developer and Technical Support with extensive experience at TOTVS, delivering full-stack solutions with Angular and PHP while also providing ERP support for Microvix/Datasul. Proven ability to build and maintain features, optimize REST APIs, and improve system performance, alongside troubleshooting complex production issues through log analysis and SQL-based investigation. Experienced in managing support tickets end-to-end, documenting actions and resolutions using KCS, and guiding customers through testing and validation. Strong customer-facing communication across chat, phone, and email, with hands-on implementation, configuration, and remote maintenance when needed.

SKILLS

- Web Development
- JavaScript
- Angular
- Typescript
- HTML5 and CSS3
- RESTful API
- API testing
- Unit Testing
- PHP
- SQL
- PostgreSQL
- Web APIs
- SQL
- Git and Github
- Docker
- JSON
- OOP
- Microsoft Office
- Progress 4GL
- ERP configuration
- Problem solving
- Technical support

EXPERIENCE

SOFTWARE DEVELOPER, MOVIDA, April 2025-November 2025

SÃO PAULO, BRAZIL

- Developed full-stack applications using PHP (Laravel), Angular 18, and NodeJS to enhance user experience
- Utilized Docker and CI/CD practices to enhance application deployment processes
- Implemented TypeScript, Web Components, and micro frontend architecture to improve code maintainability
- Creation and maintenance of REST APIs following best practices (Clean Code, SOLID, DDD)
- Utilized MongoDB, MySQL, and Redis for effective data management and storage solutions
- Integrated messaging systems using Kafka, PubSub, and RabbitMQ for efficient communication
- Active participation in code reviews and version control with Git

SOFTWARE DEVELOPER, ENVOLTI SISTEMAS DE INFORMAÇÃO, January 2025-April 2025
BLUMENAU, BRAZIL

- Developed and enhanced Java-based systems with PrimeFaces, deploying applications using JBOSS Eclipse to improve system performance.
- Integrated SAP, Nexio, and Cherwell tools to automate processes, streamlining system development and reducing manual effort.
- Implemented and managed messaging solutions with RabbitMQ and ActiveMQ for distributed systems.
- Modeled, queried, and optimized Oracle and MariaDB databases using SQL Developer and HeidiSQL.
- Provided maintenance and performance improvements on existing systems, fixing bugs and adjusting configurations.

SOFTWARE DEVELOPER, TOTVS, August 2023-January 2025
JOINVILLE, BRAZIL

- Developed software solutions in Progress OpenEdge 4GL, JavaScript, TypeScript, Java, Angular 14/16, Node.js, and PO-UI to meet project requirements.
- Contributed to e-commerce platform development, implementing best practices for security and scalability to enhance customer trust.
- Deployed and managed cloud services on Azure, ensuring application scalability and availability.
- Maintained and customized ERP systems (Datasul) to align with specific client needs and improve user experience.
- Executed integration and functional testing to ensure code quality across environments.
- Documented solutions using KCS (Knowledge-Centered Service) to facilitate knowledge sharing.

TECHNICAL SUPPORT ANALYST, TOTVS, July 2022-August 2023
JOINVILLE, BRAZIL

- Monitored and analyzed recurring incidents, implementing improvements that reduced issue frequency and enhanced system reliability.
- Supported all levels (1, 2, and 3) by resolving operational issues and platform errors, ensuring smooth back-office operations.
- Maintained accurate and detailed support records using Zendesk, ensuring clear communication and efficient incident tracking.

SUPPORT ANALYST, LINX, December 2021-July 2022
JOINVILLE, Brazil

- Opened and managed support tickets for Microvix ERP, analyzing logs, documenting actions taken, and proposing effective solutions for identified errors.
- Assisted customers via chat, phone, and email by identifying their needs, providing technical support, and guiding them through testing to validate solutions.
- Implemented and configured ERP solutions, performing adjustments, maintenance, and remote access sessions when necessary to ensure alignment with customer requirements.

- Created and maintained Technical Documentation (KCS), recording procedures, solutions, and best practices to optimize support and speed up future resolutions.

Skills: Customer Support · XML · Technical Support · Log Analysis · Microsoft Windows · Technical Documentation · Microsoft SQL Server · ERP (Enterprise Resource Planning)

EDUCATION

BACHELOR'S DEGREE

SYSTEMS ANALYSIS AND DEVELOPMENT, ESTÁCIO, JOINVILLE BRAZIL June 2024

TECHNICAL DEGREE

IT, INSTITUTO FEDERAL CATARINENSE, ARAQUARI BRAZIL December 2021

PROJECTS

- Pokémon Weather Finder, Pokémon Weather Finder is a web application that merges weather data with the Pokémon universe. By entering the name of any city, the application fetches real-time weather conditions using the OpenWeatherMap API and suggests a Pokémon type that matches the environment based on the temperature and weather conditions., <https://github.com/NicoleGomes1905/Pokemon-Weather-Finder>
- ExpatFlow, a modern expat dashboard built with Angular 18+, featuring real-time currency exchange rates and global time zones using Signals for reactive state management, <https://nicolegomes1905.github.io/expatflow/>
